

FLORENCE ROJA

Once upon a time there was a girl named Florence. She loved visiting her grandma and taking her many different types of food, such as fruit and a variety of desserts. She lived in a town near to her grandma's house located in the forest, close to a big and beautiful lake. Her mom didn't completely agree with the fact of Florence going alone to the forest because she knew all the risks that there were.

One sun shining afternoon, Florence was on her way to her grandma's house when suddenly a unicorn appeared. The unicorn started staring at Florence and chasing her to her grandmother's house. When she arrived at the house, she felt like someone or something was looking at her. So, she turned around and saw a big and shining unicorn. Florence started screaming, she loved unicorns but that one had something strange that scared her .

After a long time of running and fear she managed to arrive at her destination. When she finally was with her grandma, she told her about the unicorn and they both tried to find it. They looked around the entire forest, but they didn't see anything. So they started thinking where that unicorn could be. In the town, it was almost impossible because people could see it and call the police. And while they were thinking, it suddenly started raining, and they remembered that unicorns love water and rainbows, or at least that was what was said in books. Florence realized that the lake was only 5 minutes from them, so they decided to take a look there.

When they finally found the unicorn, they saw it under a rainbow and drinking water from the lake. They tried to talk with him but they couldn't understand very well what he was trying to say. After a while, Florence's grandmother had a great idea, which consisted of giving fish to the unicorn.

One hour later, after catching many fish, they started with the plan. They were still very tired but they had to give the food to the unicorn. The plan started well. The unicorn turned around, saw the fish and ran to them, but Florence and her grandma's plan was that when the unicorn ran to the food, they would throw the fish to the lake and then they would call the police. However, that plan didn't go well. Because the unicorn ran for the food but then, he opened its wings and flew over the blue sky.

Florence and her grandma didn't talk about that experience ever again. It was a terrifying and exciting memory that they would never forget.

The End .
